

THE NUMBERED REPORT

From brief to handoff.

A practical project outline, numbered by CSS.
Edit the content. Keep the structure.

PROJECT / NORTHSTAR

STATUS / WORKING DRAFT

01 / Define the work

1.1 Set an outcome

Describe the change the project should make. Give the team a concrete result to work toward and a clear way to recognize it.

THE WORKING BRIEF

Make the first successful handoff easy to understand, easy to repeat, and easy to verify.

1.2 Agree on the boundaries

Record what is included, who owns each decision, and what would change the plan. Keep the scope close to the work.

1.3 Choose the deliverables

NO.	DELIVERABLE	READY WHEN
01	Project brief	Scope and owners are recorded.
02	Working prototype	The core workflow can be demonstrated.
03	Handoff package	The next person can reproduce the result.

02 / Deliver with confidence

A useful handoff makes the next step clear.

2.1 Record the decisions

Explain the choices that affect the result. Include the assumptions that matter, the alternatives considered, and the evidence behind the decision.

DECISION LOG / EXAMPLE

Keep the document editable.

Store the content and styles with the project. A future edit should be a small, reviewable change to the source.

OWNER / PROJECT TEAM · REVIEW / NEXT MILESTONE

2.2 Check the handoff

Open the final PDF. Check its text, page breaks, headings, and tables. Then rerun the generation command from a fresh output folder.

- The document answers the brief.
- Every section has a useful heading.
- The source, assets, and run command travel together.

2.3 Leave a clear next step

Name the next owner and the action they can take. Keep this instruction near the final output so the work can continue without a separate explanation.

One stylesheet. Every heading numbered.
